# COMPANY PROFILE

# Growing And Expanding Since 1987

**Solid Fine Enterprise** was the first established by Mr. Tan Hooi Beng in 1987 with his humble beginning to the energy and drive of his wide experiences, bits of knowledge, and techniques in the Poultry Industry. With over 35 years of experience, our team and associates' partners are professional in terms of the design, development, setup, and supply of all the needs of production of poultry farming. Our core business is poultry-keeping equipment with superior ventilation systems and we are also expertise in green technology for farm waste manure management.

Ever since Solid Fine Enterprise rapidly grew and its business was booming, in 2014, the Founder Mr. HB Tan decided to upgrade the company from proprietorship to a private and limited company as Solid Fine Enterprise Sdn. Bhd. (SFE). Besides supplying a wide range of products and systems in the poultry industry, SFE is now well known to be professional as a one-stop solution for superior and cost-effective ventilation systems for all industries across Malaysia and Oversea.

In 2016, the management of the mother company SFE is far-sighted enough to invest in a new business division with better management control and focus on business development. The new business division is Solid Fine Greentech Sdn. Bhd. focuses to farm waste manure management with complete services, systems, and after-sales service.

# ABOUT US

**Solid Fine Enterprise Sdn. Bhd (SFE)** is the one-stop solution for ventilation systems, trusted, reliable, and efficient thermal treatment in Ipoh Perak Malaysia. We custom design and supply the best ventilation solutions for our customers that last and fit every situation and purpose. SFE offers high-quality ventilation products from world- renowned leading and reputable manufacturers that suit our customer's demanding heating and ventilation applications. Our customized solutions have evolved from innovation in Air Handling and Cooling Units, Energy Recovery Wheels & Mechanical Ventilation & Industrial Fans.

**SF Cyclone**

At SFE, we are committed to helping anyone involved in the ventilation system, no matter the size of the project. With state-of-the-art ever-improving technology, we ensure high air comfort to all our clients, who put their trust in us. Our priority is to support all our customers, especially in the agriculture sector to up forward modernization technology in any way we can, in order to see the project through to completion.

**Solid Fine Greentech Sdn. Bhd. (SFG)** is a specialist in Greentech Technology for farm waste manure management. As the preferred service provider of smart waste manure solutions for the poultry farms, SFG is committed to turning customers' needs into smart solutions, so as to help them achieve modern farms with sustainable income and improve farm efficiency. We provide customers with whole process project solutions, from project consultation, design, installation, maintenance, and process guidance. Our equipment meets the highest requirements regarding safety and health, production performance, and environmental factors. Therefore, SFG not only delivers a high-end quality system but also optimal cost-effective product performance that brings value to our customers.

## Our Vision

To be a reliable and trusted well-known Ventilation System and Greentech Farm Waste Management service provider that emphasizes branding, products, and service quality in Malaysia and internationally.

## Our Mission

At SFE, we strive to develop our company's sustainable advantage by continuously supply up to date modern and advanced technology & systems to go green that create value for money for our customers in the agriculture industry.

## Our Value

Providing excellent professional services to our clients on a day-to-day basis is what defines our core values in the following areas: -

- Customer Satisfaction
- Loyalty & Sense of Belonging
- Forward-thinking, Adaptable & Perseverance

## Our Market Place

SFE is not just limiting our business to the local market, we also export and partner our business overseas such as in Thailand and many more to come in the near future.

# OUR PRODUCTS, SYSTEM & SOLUTION

## POULTRY FARM EQUIPMENT

We supply the whole solution for our customers, including poultry farm & chicken house plans with scientific design, equipment supply, and installation supervision till the project is finished and put into operation.

## VENTILATION SYSTEM

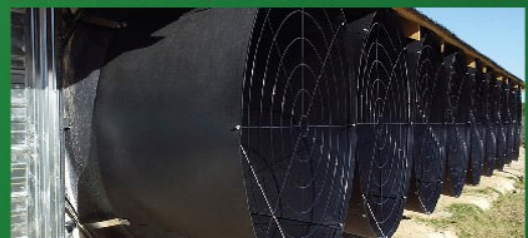

At SFE, our ventilation systems are generally broken into mechanical ventilation and natural ventilation.

Mechanical ventilation provides clean air inside a building through a ducting system, aided by mechanical means, such as disposable filters and fans.

Natural ventilation is the air that enters a building without any mechanical assistance – often through doors, windows and vents. Natural ventilation can be found in nearly every building, while mechanical ventilation is mainly found in buildings in a build-up area; buildings of high occupancy, or where required in industrial settings.

Either a combination of both mechanical and natural ventilation might be required to satisfy indoor room air quality, depending on the room or building and its function.

SFE ventilation service and maintenance consist of tests, checks, calibration, and balancing of ventilation systems to confirm their correct and efficient operation. Our team is well-trained and competent service carrying out service and maintenance work on ventilation systems, due to their complexity, health and welfare reasons, and business-critical importance.

# OUR PRODUCTS, SYSTEM & SOLUTION

## WASTE MANAGEMENT SYSTEM

Our agricultural animal farm waste manure system has been specifically designed to help you manage your costs while also maintaining your site biosecurity by efficiently managing your animal waste disposal on site. SFG delivers highly efficient solutions for safely disposing of all types of agricultural animal farm waste such as poultry, pig, cow, and goat.
